WHY IT MATTERS

On Meta, the **creative decides performance** — the same budget wins or loses on the ad itself. Knowing what's working for competitors is the fastest way to sharpen a client's ads, but done by hand it's slow, subjective, and rarely repeated. AdGapIQ makes competitive ad intelligence **fast, accurate and repeatable** — turning an occasional chore into a standing advantage.

01

Creative is the lever

It analyses the exact thing that decides Meta ad results — the creative and its messaging.

02

Automates the grind

Hours of manual Ad Library research become a 3-minute, repeatable scan.

03

Scales expertise

A small team delivers agency-grade competitive strategy for every client — no extra headcount.

WHAT YOU USE IT FOR

The core use cases the Meta ads team runs day to day:
